

Dear Rotary Exchange student (copy to club counsellor and district),

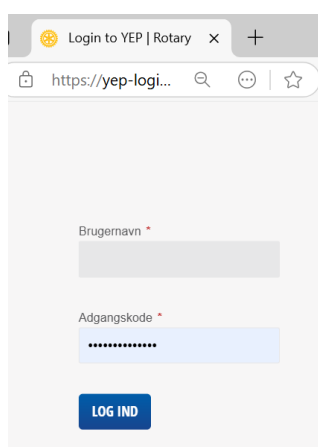

As you perhaps have been informed Rotary Denmark is in the process of changing IT-systems.

First step has now taken place, and you must use a new link to access the YEP database:

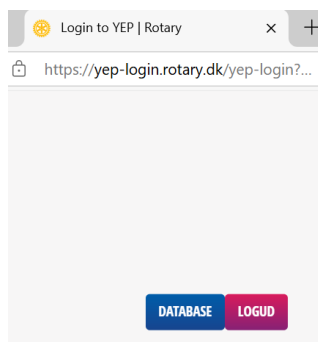

The system behind is still the same, and you must login with the same username and password as before.

Here is a short guide on the new way to log into the YEP database:

Go to <https://yep-login.rotary.dk/>

A screenshot of a web browser showing the login page for the YEP database. The browser's address bar displays 'https://yep-logi...'. The page has a light gray background. It features two input fields: the first is labeled 'Brugernavn' with a red asterisk and contains a grayed-out placeholder; the second is labeled 'Adgangskode' with a red asterisk and contains a series of black dots. Below these fields is a blue button with the text 'LOG IND' in white capital letters.

Enter your YEP-number as username and the password you used earlier. Click “Log Ind”
- Then you get this screen:

A screenshot of the same web browser after the login attempt. The address bar now shows 'https://yep-login.rotary.dk/yep-login?...'. The main content area is mostly blank with a light gray background. At the bottom of the page, there are two buttons: a blue button labeled 'DATABASE' in white capital letters and a pink button labeled 'LOGUD' in white capital letters.

Now click on “Database” and you’re in the database.

If you have forgotten your password, please contact your counsellor or youyr contact in the district in Denmark. The old way to reset password does not work anymore.

Please contact your Rotary club if you have any questions regarding use of the YEP-database.

Yours in Rotary,

Rotary Multi District Denmark
